

MiTA 论文推荐投稿名单和折扣

No	Title	Discount
7	A Novel Continuous-Time Algorithm for Nonsmooth Convex Resource Allocation Optimization	20%+10% IOAP=30%
8	Enhancing Jailbreak Defense with Diverse Perturbation Combinations	
36	Enhanced Dung Beetle Optimization Algorithm with Chaotic Initialization and Adaptive Perturbation Strategies for Robust Global Search	10% IOAP
40	Automated Policy Shaping for Multi-Agent Reinforcement Learning in Pursuit-Evasion Games via Retrieval-Augmented LLMs	10% IOAP
56	An Adaptive Preference Joint Ant Colony System for Multi-Objective Multi-agent Pickup and Delivery	100%
59	Design and Implementation of a Movie Recommendation System Based on Hybrid Recommendation Algorithms	
60	Scene Graph Generation Based on Language Model Assistance	
64	Task-Structure-Aware Ant Colony System for Multi-UAV Task Allocation with Precedence Constraints in Urban Airspace	100%
67	Ensemble Graph Neural Spatial Clustering: A Robust Framework for Spatial Domain Discovery in Spatial Transcriptomics	10% IOAP
71	A GA-RL Hybrid Framework for E-Paper Waveform Optimization	10%IOAP
72	SDformer: Spiking Dilated Self-Attention for Efficient Spiking Transformers in Vision Tasks	10%IOAP
75	Joint Task Segmentation and Offloading for User-Centric Satisfaction Optimization in Fog Computing	
80	Competitive Parallel Animated Oat Optimization Algorithm	
107	Purify and Refine: Graph Out-of-Distribution Detection via Test-time Representation Purification and Label-free Refinement	10% IOAP
108	Hierarchical Cognitive Regulation for Prompt Evolution in Large Language Models	10% IOAP
110	Deep Learning-Based Abnormal Signal Detection and Dynamic Control of Frequency Selective Surfaces	20%
112	Cement Microstructure Image Segmentation Based on an Efficient Hierarchical Multiscale Convolutional Attention Network	
116	GeoDiff: Geometry-Conditioned Diffusion Policy for Refined Robotic Trajectory Generation	10% IOAP
117	Tri-sequence-based Ant Colony Optimization for Facility Location Allocation in Emergency Medical Service Systems with Unmanned Aerial Vehicles	100%
118	Bootstrapped Unseen Prototypes for Few-Shot Inspired Generative Zero-Shot Learning	100%
119	A Theoretically Grounded Differential Privacy Framework for Mitigating Membership Inference Risks in Federated Deep Learning	100%
120	SAFE: A Semantic-Aware Flexible Evaluation Framework for Large Language Models-Based Sentiment Analysis	

121	Tri-Particle Group Collaborative PSO with Elite Reservation and Regenerative Selection	
131	Multi-scale Deconvolutional Density Estimation Network	10% IOAP
137	Improving Model Utility in Privacy-Preserving Federated Learning	20%+10% IOAP=30%
146	Patient Disease Prediction Method Based on Improved Graph Attention Networks	
150	Retinal blood vessel segmentation based on SA-UNet	10% IOAP
169	Efficient Domain Adaptation for Text Line Recognition via Decoupled Language Models	20%
170	Self-Tuning Sparse Attention: Multi-Fidelity Hyperparameter Optimization for Transformer Acceleration	20%
